Mong'ola Juu Village School

Mong'ola Juu Village Clinick

Smart Village to be completely carbon neutral with full G-energy

Clean Energy (Green H₂) Lifeline for the community and exportable

Concept of Smart Village Project

The project is to build communities of sustainable wellbeing in rural Africa, the last growth continent and a region where many social issues and poverty remain.

- 1) Realize sustainable income growth opportunities
 - Direct employment, collaboration on commodity crops, etc.
- 2) Provide basic infrastructure
 - Electricity, internet/WiFi, clean drinking water, education
 - **healthcare**, etc.
- 3) **Zero carbon** / large scale Co2 sequestration.
 - Generation of electricity from our own solar power. Large-scale Co2 absorption. Emissions trading
- 4) Creative Communities / Well-being for Life
- 5) Realize it as a sustainable and profitable business (sustainability)
