- Development project management and consultation in the field of market linkage, value chain development

# Why Ugandan Cotton?

## 1. Organic and Sustainable

Certified under international organic standards. Grown using natural organic farming practices on land where synthetic fertilizers have never been used.

## 2. Social Impact

Supporting small-scale farmers in host communities and engaging refugees in production to improve their livelihoods and promote self-reliance.

## 3. Traceable and Transparent

GOTS-certified, the cotton is fully traceable to the farm level, with secure and fair payment protocols for all suppliers.

# Why Uganda?

## 1. Blessed by the Power of Nature

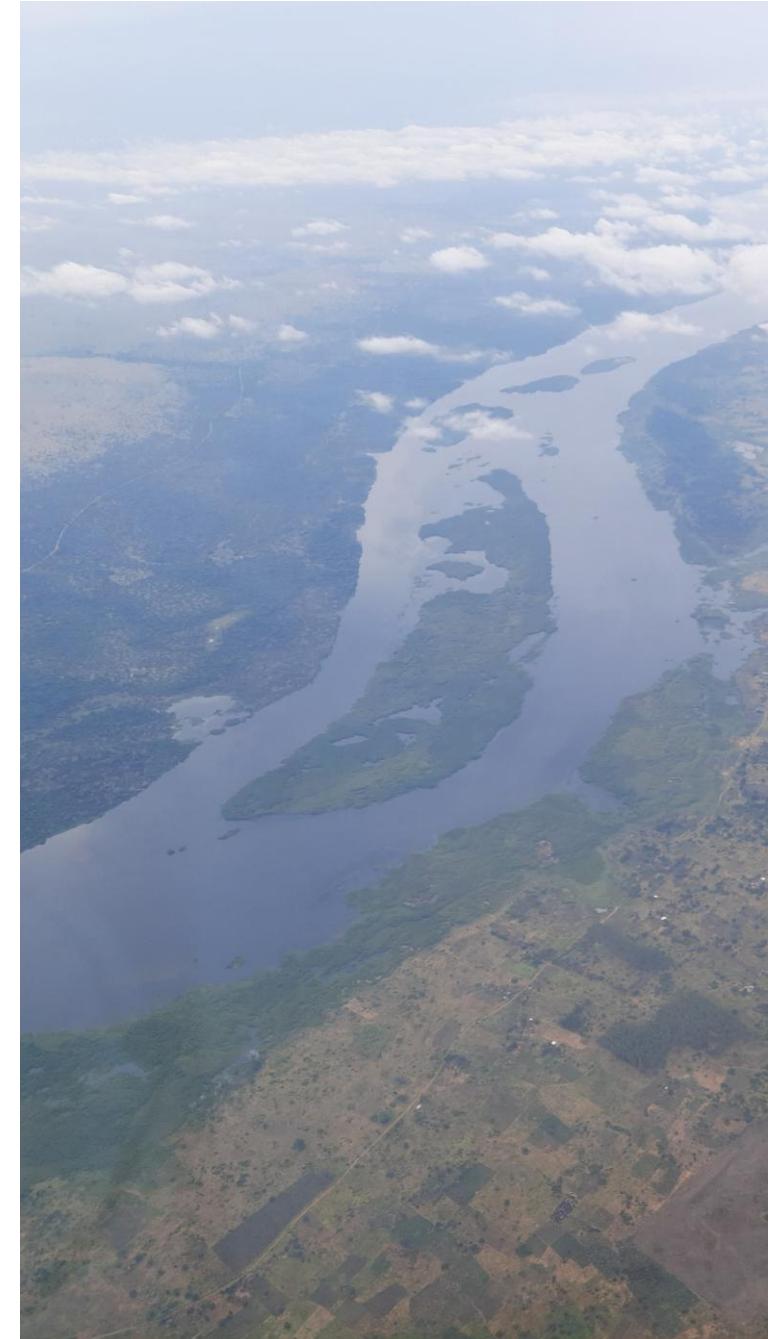

Described by Winston Churchill as the "Pearl of Africa," the country is blessed with natural beauty. As the source of the River Nile, the country benefits from abundant rainfall, enabling 100% rain-fed cotton production without irrigation.

## 2. The World's Most Refugee-Friendly Country

Uganda's open-door policy for refugees is recognized by the UN and the international community as one of the most progressive and supportive in the world. The country is committed to "Uganda Model", developing its economy in partnership and cooperation with refugees.

## 3. Trusted Partners and Supporting Institutions

The local supplier, GADC, operates under a reliable and transparent production management system. The project is supported by the UNHCR Uganda Office and the Office of the Prime Minister's Refugee Department, the national authority responsible for refugee policy.
