■ Greener Africa

Realizing a sustainable society in Africa, where the risk of climate change is high, through solving environmental and social problems

■ Growing x DX-ing Africa

Capturing demand from Africa driven by population growth, urbanization, higher education levels, changing lifestyles, implementation of the AFCFTA, and adoption of digital technology through platform type business that can provide synergies and long-term growth

■ Resource-rich Africa

Securing critical resources unevenly distributed in Africa and supplying them to the global market

Thank You!!
