**My Agile Digital transformation training experience**

I'm quite pleased with this training. The facilitators were wonderful. They had good knowledge of the courses and were excellent in their delivery. They were also very available to take questions and support participants. I highly recommend this training to anyone seeking career advancement or career change.

**Student**

My name is Everest Idongesit Obot, just graduated from a Learntor - Agile Digital Transformation Institute. My experience with Learntor was an eye opener into Digital space, I learnt skills I didn't even imagine exist in IT world. The Facilitators were one in town, they're teachers, always ready to take it steps by steps until you understand it, they always ready for support anytime. That is my experience. Thank you.

**Learntor a comprehensive learning...**

Learntor a comprehensive learning platform in digitally upskilling in Agile, Scrum, Kanban, Data Analytics, Design Thinking, Business Analysis.

I am so excited by earning an international certification

★★★★★ 15 Nov 2020

**At Learntor**

At Learntor, I was exposed to work tools that I had never used before. Tools that make the agile work experience seamless. The facilitors for all the courses - where the best at what they do, highly professional, always willing to attend to questions and helpful with further information. I also had the opportunity of getting further Agile Scrum training from the top two Scrum organizations, sit for the certification exams and passed both. In all, Learntor has exposed me to a whole new world of possibilities in Agile.

Moving Forward, Digitally

# THE NATION BUSINESS WOMEN IN BUSINESS

**Learntor, a Nigerian digital consultancy company focused on agile digital transformation, data analytics, and digital marketing, is launching the campaign to digitally up-skill Nigerians, particularly women, with anticipation of scaling across Africa. With over 2,000 already trained in digital marketing, its founder, Mercy George-Igbafe, has set an audacious target to train at least 5,000 women next year. The digital strategist is on a journey to equip women and organisations with the necessary digital skills to achieve competitive global edge. CHIKODI OKEREOCHA and KELVIN OSA-OKUNBO report.**

## Bridging digital skills gap

**B**ridging the digital skills gap is a challenge that women face in the current digital economy. In Nigeria, the digital skills gap is a significant barrier to economic growth and job creation. Mercy George-Igbafe, founder of Learntor, is leading a campaign to digitally up-skill Nigerians, particularly women, with anticipation of scaling across Africa. With over 2,000 already trained in digital marketing, its founder, Mercy George-Igbafe, has set an audacious target to train at least 5,000 women next year. The digital strategist is on a journey to equip women and organisations with the necessary digital skills to achieve competitive global edge. CHIKODI OKEREOCHA and KELVIN OSA-OKUNBO report.

Mercy George-Igbafe, founder of Learntor.

# Business Lack Of IT Skills Major Cause Of Unemployment In Nigeria –Igbafe

**As many youths seek to enhance their chances through Information Technology (IT) skills for them to be gainfully employed in the country where there are few jobs, there are companies which offer uncommon services to boost employment opportunities. Mrs. Mercy George Igbafe, an Agile Coach and Master Of Learntor, in this interview with JUSTUS ADEMIHOH and ESTHER OKON, speaks on a number of issues related to digital education. Excerpts:**

**Q: In a world where digital skills are in high demand, why do you think there is a significant gap in IT skills among Nigerians, particularly women?**  
**A:** The gap in IT skills is primarily due to a lack of access to quality digital education and training. Many Nigerians, especially women, do not have the necessary digital skills to compete in the global market. This is a major barrier to economic growth and job creation. We need to invest in digital education and training to bridge this gap.

Igbafe

**Q: How do you see the role of digital education in bridging the skills gap?**  
**A:** Digital education is the key to bridging the skills gap. It provides Nigerians with the necessary digital skills to compete in the global market. We need to invest in digital education and training to bridge this gap.

**Q: What are the challenges you face in providing digital education to women?**  
**A:** The challenges we face include a lack of access to quality digital education and training, a lack of financial resources, and a lack of social support. We need to invest in digital education and training to bridge this gap.

# THE NATION BUSINESS WOMEN IN BUSINESS

## 'It's time for Africa to start building digital capacity'

**The array of exciting career opportunities in the digital space are too tempting to ignore. From Artificial Intelligence (AI) to Data Analytics, Big Data, Coding and Digital Marketing, among others, building the capacity of Africans to seize these opportunities have never been so compelling. Accordingly, the founder of Learntor, a Nigerian digital consulting company, Mercy George-Igbafe, is leading the charge, through free training, to raise and expose Africans to these highly demanded digital skills. With over 2,000 youths and women already trained, she shared her company's plan to up-skill 5,000 people by 2022 with Assistant Editor CHIKODI OKEREOCHA.**

Okereocha

**'What contents are we creating? What value are such contents adding to Nigerians' lives? YouTube houses 95 per cent of the world's contents, but the question is: are we really learning? On YouTube, you will be shocked to see that what Nigerians go online to do in football, entertainment, music etc. We are very big on trends. But why can't we use that time and develop some muscle skills that can help us get jobs?'**

**'We need to create developers, who understand what it means to work within an agile organisation; people who understand what it means to become a business analyst within an organisation, because you are not working alone as a business analyst or developer, but you are working as a team. You need to know how to communicate effectively within the team. A lot of start-ups are beginning to operate the agile way of working.'**

**'Developers are one of the most sought-after people in the world today because they understand what it means to code,' she pointed out, insisting, 'We need to develop capacity.'**

**'Merely also said Learntor's 'Free Career Open Day' is open for everyone no matter the age for an agile digital transformational learning experience. She said learners should be exposed to highly demanded skills in Agile, Scrum, Kanban, Design Thinking, Data Analytics, Business Analysis and Project Management office with opportunity for hands-on practical experience. The three-day Free Agile Digital Career Open Day will hold from June 23 to 25.'**
